>>
>> Joel,
>>
>> Chick got a hand written note from Senator Sherrod Brown saying he's going to work with us. He of course is an Attorney. (His "aid" Babcock tried to negotiate with us to " get what the USW got" and we said what the hell did they get that we didn't!). Now with this new info about to break on Lockheed getting money to administrate these programs (should be out in the next day or so) that don't mean much. The election is coming up and so far everything has been in the dark! So we don't know what that means exactly. Don't know how this could proceed without someone being charged. Talk to Chick he is home now 740 289-2331. Perhaps Senator Brown will open up to WBNS as well and suggest how this will proceed. A Senatorial hearing would be the proper action . Will he agree to that?, I don't know but both he and Clare McCaskill (Chair of Senate Committee on Government Contracts) are up for election, as is Joe Manchin III.

>>>
>>> Joel,
>>>
>>> I spoke to Mark Grannus. He was the individual brought in to correct the transuranic situation at Piketon i.e. Neptunium , Californium , Americium. He was University trained at Perdue. He states that he was blocked from doing his job by a Mr Ed Wagner. Ed Wagner was his direct boss. Grannus further stated that Wagner Lied to DOE about Health Physic matters to DOE in order for Lockheed Martin to get their performance bonuses (as laid out in the contracts we posses.) These bonuses amounted to millions and Billions of dollars in the long run. Grannus was fired by Dale Allen Plant Manager and John Shoemaker on a trumped up sexual harassment charge by a secretary who gave him erasers on pencils that looked like penises. He is ready to talk. If we could talk to him specifically about these subject only it fits with what we are saying. Like Ed Wagner ,(we have other info that Wagner altered the Neutron figures), why he was brought to the plant to begin with and how he left and why.

>>>
>>> Thanks,

> > I respectfully decline your answer and do respectfully appeal the findings of James Vandenberg Special Agent in Charge of the Chicago Division of the OIG of the DOL. I am officially doing so now The information I brought forward affects the mass of the individuals at the Piketon Plant. Because your organization did only talk to me over the phone in what I would describe as a cursory discussion without so much as reviewing the evidence it would confound any reasonable thinking person to suggest that you made reliable findings but more over are moving to disregard this allegation because it affects your organization. I hold the right to formulation of that opinion based on the level of allegation I made to you. Specifically that The IG of DOE is lying to your EEOICPA and as I have quoted your employee Larry Elliott has stated that he "Knows the information is criminal but you do not have the purview to come forward. There in lies the complaint that the DOL has taken money to recreate dose that was criminally falsified. Also your personel have engaged in activity that could be properly scrutiniezed as wrong. Not withstanding the "dose Recreation" performed by Piketon Plant Officials and presented as fact. I have personally informed you otherwise and have invited you to the table with Charles Lawson and myslf " with documents." Without a proper review of the documents we possess it would appear that you have grabbed the finding out of thin air. In my opinion.

>>

>> We have a letter back from Holders office. Of course we used my case as a case study but only to point out what has been done and how it affects the eeoicpa dose reconstruction. Frank Gerlach who is the Attourney who sent it in said it looked klike a "get this off my desk", letter. They said my case ran out for criminal and civil rights @5 years. That wasn't what we filed but that was their answer.

>> We have however pinpointed who was regulatory oversight and it was The NRC.

>> A Mr Oscar DeMiranda (chirf of allegations division) called Mr Gerlach back after the May 19 meeting and said they knew nothing of our allegation. That statement is false. I have the letter I sent to them in 2006 stating the very things we alleged. They assigned it a case Number and claimed they didn't have the resources ro come to the site to get the documents. As soon as we look at the contracts (thurs) and establish their oversight. , we will offically contact them. We are not going to be slowed down by this and really are probably in need of the Senate hearing. If not we intend to invite everyone involved and publicly put the info out in a public hearing with all retires sick and injured workers news agencies and all public officials to be identied and invited as well as the regulatory agencies involved.

> > Rachel,
> >

> > The basic parameters of my suit is a Tort. It was originally against Lockheed. I originally filed it in 1996. My Attorney Steve Edwards and I suspended the original case. The reason is as follows. The Lockheed company and their Lawyers Voyrs Sater Semour and Pease did not provide complete "Discovery" , we asked directly for documents in their possession that said they knew "in fact" that the plant was leaking when we first filed. Lockheed and their Lawyers were not forthcoming so the "Tort" panned out as only a workers comp case and we suspended it for fear of entertaining the wrath of the Federal Judge for miss filing. They supplied documents that were "blacked out", defishent, and held to be "Government Secret". That not with standing they failed to give us documents stating that they in fact had knowledge the system was leaking and that the Lockheed Company knew it. In 2007 (late) a salaried Environment Safety and Health person at the plant literally hit me in the stomach with three documents rolled up. The documents tell that in 1990 the Piketon plant was managed by persons not qualified to manage. (Per Burns and Roe Tiger Team Report) Further in 1992/93 a Purdue University trained Health Physics Expert was imported to the plant from OakRidge. His job was to " change the culture at Ports. This man found Transuranics; Americam Neptunium, Californium, etc at the plant many more times powerful than Uranium. He found unlawful movement of Uranium baring materials He also warned the management that the X326 was leaking profusely . He warned that it was leaking the most during August. (I was injured along with others on 7/26 /94. The management knew but covered it up. Changing my Dose for uranium exposure, altered my medical diagnosis, and hid the documents (logs) at the work site I was injured at which said in fact that the system went " Above Atmosphere and leaked." Management failed to hospitalize workers besides myself who were also injured. Lockheed / USEC was getting or about to get Millions of dollars for the HEU suspension program (Highly Enriched Uranium). (Very important) Mr. Granus advised the company that the project should shut the project down. The then plant Manager (outgoing) Ralph Donnelly sent letters to DOE Hdqs Bill Bennett, and Lockheed Martin Top Mgr Wendy Fields with Granus' letter attached saying they had done studies in December and suggested they could keep a building 1/8 mile wide and 1/4 mile long with thousands of miles of pipe and many more valves opperating " Below Atmosphere" . Grannus says this is a physical impossibility! Grannus says he was "fired" for bringing these amongst other things out. (I have these documents) Management also lied directly and hid the work logs from the day I was injured from the DOE Investigator Randy Devault. Devault has acknowledged that he did not see these logs(I sent them to him). Devault is aware that a crime has been committed and will not come forward. DOE should be aiding me if I made an allegation of criminal wrong doing, yet they stand dumb struck guarding their cohort in crime. I keep asking myself what I have to do to get a proper investigation on one of these DOE sites. One thing is for sure you all had better be investigating DOE and not be letting DOE do the investigation like Senator Thompson did. Doe is a purpetaitor in this thing. They got Billions of dollars in the privatization. They participated in covering up for their subcontractors at Ports (we have the documents they sent letting USEC investigate themselves in this dosimetry fiasco) , and now they are

the clearing house and resident experts for how much dose people were getting at Ports. Please come and review our documents with Congressman Whitfield's expert and we believe that you will see what we see. Cathrine Demirs of SC&A said our documents were the "smoking gun of the industry." I want these people who were injuring the workforce and now standing in the way of the truth in why their dose can't be reconstructed, held responsible for their actions. I want you to hear the tape of Larry Elliott NIOSH saying he knows what was done at Ports was criminal but that NIOSH has no purvue to come forward and tell it. I want you to hear directly from the mouth of the person who was with John Cardarelli and Steven Arnholtz of NIOSH when the hidden logs were found in their presence saying the x326 went above atmosphere and was leaking and ask why they had no purvue to tell a crime had been committed in an injury accident on a DOE site. I don't know how much more susscinct I can be with all due respect! Besides there are more people than me working on this and some just want a fair hearing and clearing of this information so that a person can have "all" the facts when trying to make their mind up about what went on at Ports and who is really in charge and operating above the law.

Vandenberg says he is gathering info on what I 'm saying and how many times we(I) contacted the DOL to report taking back to Washington. I recounted several ways including this last series of letters. I tell him DOE IG is telling Lies on Piketon to elected officials The series starts with Dr. David Michaels Dec. of 2010. Then letter from Thomas Galassi Director of Directorate of Enforcement OSHA comes back to me in May 2011 saying I should go to NRC Statute of limitationsetc. During this period between Dr. Michaels I am also talking directly to Steven Weitz from OSHA who says it sounds criminal to him, says it was kicked to him but he doesn't under stand why. I tell him we believe it to be criminal as well and that he better report and that is when Director Galassi gets in the picture. We meet with four Senate Reps including Portman Brown Manchin and Paul and lay the allegation out to them . Sept 2011. I then rebut Galassi's letter in Dec of 2011 after Senate meeting and re-evaluation of our position by our team. After my re-buttal Director Galassi sends me the letter April 10 of 2012 saying it was going to IG. I wait 10 days and call I. G. myself Marcus Eder at OIG hotline and inquire about Galassi's letter and statement to me. Eder says "no such letter exists or complaint." I file the complaint myself on that date. Eder confirms filing and says the matter is being sent to OIG Div. of Organized Crime and Racketeering. I wait for nearly 50 days re contact Eder and tell him of the Washington trip and he tells me the filing number 77381 (Hotline Div.) and is forwarding my email and concern to DOL Org Crime DIV. Vandenberg later repeats this number 77381 when he calls June 15th. Say he isn't running me around but the Hotline number is the only one yet assigned. Then I called you.....

I guess they felt like they don't have to represent the Kentucky workers from Eastern Kentucky. Paducah and Piketon are Federal facilities period. They just happen to be in Ohio and Kentucky so in my opinion when the Senators or Congressmen from Kentucky won't help it's the information they can't file. Eastern Kentucky workers are not in limbo we have proof of what was done and it affects every Nuclear site in the country.
